ALACTO PLANT OF THE

Item #15 Remarks

The acreage listed under the proposed place of use has been fully cultivated and a cultural map developed, however, release flow measurements will not reflect the amount of acre footage needed to successfully irrigate this acreage until the seasonal runoff returns to normal. Historically, measurements have not been taken and we are therefore unable to determine the acre footage released from this reservoir for irrigation. Due to the uncertainty of future water years we are unable to determine the length of time it will take to prove beneficial use.
